# Better-Whois.com

... SEARCH ALL DOMAIN REGISTRARS

## What's wrong with WHOIS?

The domain business has been deregulated... For the first time, many different domain registrars are granting domain names

But there is a problem, the standard WHOIS domain search used on thousands of web sites is no longer accurate. Why? Because each domain registrar now keeps their own WHOIS database which doesn't include domains registered by competing registrars.

www.	<input type="text"/>	<b>Search</b>
Searches shared database registry and queries appropriate registrar.		

Accurate domain name lookups are essential. When a search says a domain name is available - it should be available. That's basic. Misleading information can result in lost names, business disruption, disputes, and more. It affects name registration services, web hosting companies, web site owners and Internet users

**How to get accurate results?** In this changing system of increased competition and new registrars, the only way to get an absolutely accurate domain report is to:

- lookup the domain in the shared domain registry
- locate which registrar has reserved the name
- visit and query that registrar's database for the correct information

**BetterWhois.com does this for you instantly.**
